Which loans permit additional payments?
Fixed rate loan: Only up to $\$ 20,000$ during the fixed rate period without incurring Economic Costs. (Important: redraw is not available on fixed rate loans)
Variable rate loan: Any amount of additional repayments can be made.

What is the difference between an offset account and redraw?

An offset account is a separate deposit account, similar to a transaction account, which is linked to your loan. This account allows you to access your cleared funds while offsetting against the balance of your loan.

A redraw facility is not a separate account but a feature within your loan. It allows you to access additional payments (the amount above your scheduled payments) that you've made - refer to Scenario 2 and 3 to understand how it works. Both can help reduce the amount of interest you pay on your home loan.

How does redraw affect your loan balance?
Accessing additional funds from your loan, including withdrawals or transfers, will lower your available redraw. This may cause your minimum repayments to increase in order to ensure that your loan is on track to be repaid within its contracted term.

Can I adjust my repayments after I pay a lump sum payment to the loan?
Yes. You can request to reduce your repayments, however, this will reduce your available redraw over time (see scenario 2). Please call Customer Care to make this adjustment.

How can I repay my loan earlier?
After making an additional or lump sum payment, you can also nominate a reduced maturity date by calling Customer Care on 1300300989.

Why does my available redraw fluctuate?
Your available redraw is the difference between your loan balance and scheduled limit.

As interest is calculated daily and charged to your loan at the end of each month, your available redraw will sometimes appear lower until your next repayment is made.

When will we recalculate your minimum repayments?

## Understanding redraw and repayments

$\checkmark$ Redraw (when total redraw, i.e. total deposits less total withdrawals, are greater than \$1,000 per calendar month)
$\sqrt{ }$ Rate increase
$\sqrt{ }$ Rate decrease

ASTUTE
SIMPLICITY HOME LOAN ${ }^{\text {w }}$

## Understanding redraw \& repayments

Redraw is the term used to describe the ability to withdraw funds from your variable rate home loan account where additional payments have been made to the loan.

## Benefits of redraw

- Access to additional repayments made, any time through StarNet and debit card.
- Free EFTPOS and ATM transactions via NAB and rediATM networks.
- Set up unlimited direct debits for convenient bill payments to your nominated account at no cost.
- Flexible repayment options including BPAY In, direct deposit, salary crediting and direct debit.

The amount of redraw available (or the amount of additional principal repaid) is calculated as the difference between your current loan balance and your scheduled loan limit (your planned loan position).
To ensure that your loan is paid off by the end of your contracted loan term, available redraw may reduce over time so that your loan balance will be zero. This will vary depending on how you choose to manage your repayments, as shown in the following scenarios:

## Scenario One

Sarah takes out a $\$ 500,000$ variable rate home loan with a loan term of 30 years, and makes principal and interest repayments. The graph shows how her home loan balance will decrease over time.

## Scenario Two

Sarah makes a $\$ 100,000$ lump sum payment towards her loan in year 10 , and her repayments are reduced to allow her to pay off her loan over remaining 20 years.

## Scenario Three ${ }^{\text { }}$

Sarah makes a $\$ 100,000$ additional repayment toward her loan in year 10 , and continues to make the same unadjusted repayments (i.e. higher than the minimum repayments required).

## Things to consider:

If you make a lump sum payment, your repayments will recalculate to your lower balance in the event of a rate change, or total redraw (i.e. total deposits minus withdrawals) of $\$ 1,000$ or more in a calendar month. Withdrawals include direct debits, ATM, EFTPOS cards and redraw.

To avoid your repayments recalculating to the minimum in the events mentioned above, you can nominate to pay a higher repayment in Starnet or by calling Customer Care on 1300300989. You can also call us to recalculate your repayments at any time.
'Once off Future' payment will offset any regular scheduled repayment for one calendar month from the date of payment clearance, which is 5 days after the repayment has been received (i.e. if a lump sum future payment of $\$ 10,000$ is deposited on the 5th January, and a repayment of $\$ 2,000$ is due on the 15 th January; no direct debit will occur as the lump sum is more than the required $\$ 2,000$ repayment).

## Understanding your available redraw:

What happens when I make a once off lump sum payment, or regular additional repayments to my loan and I choose to...

|  | Lower my monthly repayments? <br> (see scenario 2) |
| :---: | :---: |
| Is my redraw <br> available? | What will happen to my redraw? |
| Yes | Your redraw will gradually reduce to <br> help make up the difference from <br> your lower repayment |

| Keep my current repayments the same? |
| :---: |
| (see scenario 3) |

Your available redraw is always the difference between your loan balance and your scheduled limit.
